## PermHalo™ ; PermGuard™

A New, Innovative, Anti Solution Dripping Headband  
Makes all current COILS Obsolete, Including Celludri & Cellucotton

U.S. Patent 6311698

Tempe, Arizona.....Shairon Int'l. Trade presents its most recent invention which revolutionizes perms and hair treatments in a safer and more comfortable ('worry free') process. The new product, **PermHalo™** headband, prevents perm solution dripping, thus eliminates eye burning and skin irritation, while applied along the hair line of the customer during the hair treatment. By catching drips and absorbing solution, the **PermHalo™** eliminates or reduces adverse affects and potentially harmful use of **perm solution**. Also it lasts **75 times** longer than existing coils.

The **PermHalo™** is the result of **the** joint efforts of three inventors, combining 90 years of industry experience. The team has been preparing for the production of the new device, the **PermHalo™**, or **PermGuard™**, which was originally invented by associate Katie Vaughn, a 30-year hair stylist expert, with the contribution of team engineer Patrizia Gonella. Among other things, the **PermHalo™** eliminates the adverse affect and potentially harmful use of **perm solution**.

The **Perm Halo™** is a headband, anti-dripping device, applied on the person's hair line, thereby preventing solution (hair treatment chemicals) from running down on the forehead, neck, back, ears and face during perm hair treatment. In addition, the **PermHalo™** makes the perm more comfortable because of special material, design structure and softness. It also eliminates multiple usages of current, inefficient, ill-looking coils, such as the CelluDri® Perm Coil. (CelluDri® Perm Coil is a registered trademark of Little Rapids Corp.)

According to Mr. Tsiyoni, General Manager of Shairon int'l. Trade Co., this innovation will make all existing devises *obsolete* soon as the **PermHalo™** becomes available at beauty salon suppliers. He added that "*using the PermHalo™ gives every beautician 'peace of mind' as it eliminates potential risk for hair dressers and possible damages to the customer's forehead, ears, face neck and back*".

*The company intends to recruit national distributors soon to sell the PermHalo™ nationally.*

Shairon Int'l. Trade Co., founded in 1988, develops ideas and markets its own products, and also manufactures and markets products for other inventors. It has the least expensive program for inventors in the USA. See [www.shairon.com](http://www.shairon.com)

## INTRODUCING PermHalo™ ; PermGuard™

U.S. Patent 6311698

A New, Innovative, Anti Solution Dripping Headband

**PRODUCT:** Perm Halo™, a revolutionary headband anti-dripping device,  
which

catches drips and *absorbs solution* when applied on the hair line, thus reducing adverse affects, and potentially harmful use of *perm solution*.

**USAGE:**

In Beauty salons, Parlors, and Barber Shops:

1. To prevent hair treatment chemicals from running down on the forehead, neck, back, ears and face during perm hair treatment.
2. Easily traps messy fly-away fibers.
3. Eliminate dripping chemicals, which are a major problem for every person receiving hair jobs, causing skin irritation all around the head, face and neck.
4. Eliminates potential risk for hair dressers and possible damage to customers.
5. Makes customers happier and drier.

**SOLUTION:**

- a. In compliance with state laws (State Cosmetology Board), the **Perm Halo™**; **PermGuard™** protects customers against chemical solution dripping on the forehead, ears, face neck and back.
- b. Protects eyes and skin from irritation.
- c. Makes customers feel more comfortable, safer and protected.
- d. Gives Hair Dressers 'piece of mind' having protective material for their clients.
- e. Saves money by eliminating excessive purchasing and usage of cotton-type, ill-looking, less efficient materials currently used by hair dressers.
- f. Saves time and discomfort by enabling the use of just one or two devices instead of the cotton-made lines currently left by 6 or more devices.

**ADVANTAGES: PermHalo™ Vs. Celludri, CelluCotton and all Coils**

- a. Being safer and more efficient, it complies with state laws.
- b. It provides better protection to eyes, skin, and neck.

*Proceed to the next page*

- c. It makes the perm treatment classier being nicer and prettier. (At a rate up to several hundred dollars, customers deserve royalty treatment.)
- d. In general, customers do not like the current coils with cotton look, which gets messy easily and becomes uncomfortable.
- e. It provides perfect absorbance of the perm solution, compare to uncomfortable current coils, which gets soaked and wet, causing dripping of solution.
- f. Saves frequent replacement of current coils, multi times for each customer.
- g. Happy customer will eventually spread the change, which is expected to be fast among customers.
- h. Simply, customers do not really like the current coil, but have no choice.
- i. It's time to bring quality to this industry, and classy, nice looking, comfortable **PermHalo™ is the future.**
- j. **Most importantly:**

Experience clearly shows that customers at the testing salons REQUESTING the use of **PermHalo™**, and **refuse to use any of the current coils.**

- OPERATION:**
- Anchor the **Perm Halo™ - PermGuard™** to a rod in the first row of perm Rollers.
  - Tuck (stick) both sides of the **PermHalo™ - PermGuard™** under the rods along the hair line.
    - Cross both ends of the device behind the head; Bend both ends over & under the sides, respectively.
